When you are sunning yourself in the garden today, listening to the chirping of the birds as they hop from bough to bough, and observing how well the flowers are coming on, read this sentence, from a despatch which we had yesterday morning from Charlotte-town, P. That the Canadian Northern look to the north for much of the trade of the future is evident from the manner in which they have undertaken the development of their railway system in that direction. Messrs. Patland & Thorp, merchants of Bentley and Binsley, have this month made a change in their mode of business. Recognizing that cash buying gives them a great advantage in prices on goods they carry, and as a consequence goods can be sold to the consumer cheaper, they have decided that from April 6th all transactions at their store will be for cash or produce. This change they are sure will be to the mutual advantage of their customers and themselves.

Dr. D. J. Bechel, of Lillo, Alberta, whose name was struck off the register of Alberta Physicians by the discipline committee of the Medical Council, has by order of the Chief Justice, had his name again placed on the rolls. In ordering that Dr. Bechel be reinstated, the Judge scored the Medical Council severely. He said the powers given to the Medical Council by the Legislature were for the purpose of allowing that body to regulate private practice, much less for the purpose of enforcing "professional ethics." He ordered that the Medical Council pay Dr. Bechel's expenses in the case.

It is estimated that seventy thousand from the United States

will arrive in Western Canada during the coming year and will settle on homesteads in the three prairie provinces. This is an estimate placed on the American movement by J. B. Walker, commissioner of immigration. These newcomers will settle on 31,000 homesteads and will have under cultivation lands of the next two years over 5,000 square miles of additional territory. The movement across the line is so far this season 100 per cent greater than last year, and it has been found necessary to put on extra inspectors at Emerson and North Portal to handle the work.

Patrick arrived much the worse for wear. One eye was closed, his nose was broken and his face looked as though it had been stung by bees.

"Glor' boy," exclaimed his wife, "The Dutchman Schwartzkammer—'twas him," exclaimed Patrick, "Shame on ye!" exploded his wife without sympathy. "A big speckled the likes of you to get made up by a little combsman of a Doctor—the size of him! Why—"

"Whist, Nom," said Patrick, "don't speak disrespectfully of the dead!"

Demand second, in 2:45, and Pat Maloney, the Irishman, third. Tom Longboat cut at the twentieth mile. He claimed his stomach went back on him. The winner took the lead from the start, and by beautiful running kept first place till the tenth mile, where Shrub, the English runner, displaced him. He kept the lead till the twenty-first mile, when St. Yves again overtook him. Shrub was then walking but after a game fight he quit after another mile.

ENORMOUS GROWTH OF GRAIN IN THE PROVINCE

Forty-two Million Bushels Harvested in Alberta Last Year, Says Local Authority.

"Oh, yes! There is nothing very unusual about that," remarked Mr. L. P. Strong, manager of the Alberta Pacific Elevator company, speaking in reference to the sale of 150,000 bushels of Alberta oats put through Monday. The shipment is consigned to the state of Washington. "That has been going on for the past six months," continued Mr. Strong. "About 14,000,000 bushels of grain were raised in Alberta last year, and an enormous amount of it must have gone west. There hasn't been any extraordinary increase in the shipments through Fort William this season, so it must have gone the other way."

"Is there very much Alberta grain being shipped by way of Vancouver?" he was asked. "Not now," was the reply; "most of it has gone. The last shipload left Vancouver yesterday for Mexico, and the last consignment for the British Isles about ten days previous."

The Alberta oats that are being shipped to the Pacific coast states in such large quantities this year for the first time, are especially adapted to the manufacture of breakfast foods. A large amount of it is also used as seed grain. The price paid for these shipments of Alberta oats is slightly better than the quotations on the Winnipeg grain exchange. The demand for Alberta grain in the Pacific coast markets is expected to increase with leaps and bounds in the future, and will be a tremendous factor in the development of the grain trade of southern Alberta.

Shaw Gets Acquainted.

Bulletin: R. Shaw, member-elect for Stettler, came up to the Capital last evening with W. F. Puffer, M. P. P., for Lacombe. The two members have been competitors in the live stock trade for years and even the fact that both have a seat in the Legislature will not prevent one getting up a little earlier than the other to secure a bunch of cattle.

"I am going to take Mr. Shaw down to the buildings this morning and introduce him to the heads and deputies of the departments," said Mr. Puffer to a Bulletin representative. "He will have to look after some of the territory that need to be in my constituency, so I am going to give him as good a beginning as possible."

Mr. Puffer stated that preparations are under way for the construction of what will be the first rural electric line in the province. This is the Lacombe-Bullhookville and Alis Railway, which radiates east from Lacombe. Mr. Puffer saw the charter through the House last session and expects that capital will be sufficiently forthcoming to commence construction at once.

English Teachers for Alberta Schools.

One hundred and twenty-five letters of inquiry in three mails at the Department of Education tell the story of the interest which the British teachers are taking in the opening in this province for school teachers.

While D. S. MacKenzie, deputy minister of education, was gathering information in the British Isles as to the educational system in vogue there, and how it was administered, he was frequently interviewed by London papers and others as to the needs of teachers and the educational conditions in this province. This has given rise to the unprecedented inquiries that are being made.

"In two days after my return to Edmonton," said Mr. MacKenzie, "there were 76 inquiries at my office from British teachers. The British mail which arrived today carried 40 letters of inquiry."

Mr. MacKenzie referred to the mild criticism of the Montreal Daily Star, which said in the issue of March 17, that teachers for Alberta should come from the Eastern provinces instead of from the old country. The reply of Mr. MacKenzie to this article

would be that teachers cannot be secured in sufficient numbers from the east. Last year there were openings in the province for 300 qualified teachers, and the situation had to be filled to a large extent by granting permits and provisional certificates.

Mr. MacKenzie says that there are openings for 200 teachers in Alberta this year and he feels that the department is justified in extending a welcome to all teachers from across the water who possess all the necessary qualifications and probably more than are required of the teachers at home.

Alberta Certainly Growing Fast at Present Time.

Edmonton, April 5.—The formation of local improvement districts in the province of Alberta is considered one of the surest and most marked in the march of progress.

It is learned in the office of the tax commissioner, at the parliament buildings this morning, that no fewer than fourteen local improvement districts have been formed in the province this year. The first step for a district so formed, is to elect commissioners, to levy, collect and expend the taxes in improvements on the roads and bridges in the locality. The tax commissioner is not entirely relieved, however to exercise a judicious supervision over districts and secure the assistance of the attorney general's department for the collection of arrears of taxes. Many thousands of dollars were placed at the disposal of the local improvement districts this year by the adoption of this policy.

It might be imagined that the total assessment collected by the tax commissioner would be considerably reduced by the formation of so many local improvement districts. The fact is that the settlement in outlying districts has so greatly increased that the assessment handled in the tax commissioner's office this year is about the same as in the year previous. It is expected that the assessment will be \$100,000.

Valley City News.

The community was startled to learn the sad intelligence that Miss Adeline Hartle had gone to her long and peaceful resting place.

Death came very suddenly at 12:45 p. m., March 23rd last, and we mourn our loss.

Miss Hartle, who was born in 1890 was the eldest daughter of Mr. and Mrs. Wm. Hartle of Minden, Ont. At the age of twenty-five she left Ontario, taking up her abode with her uncle, Donald C. Hartle, in South Dakota.

Though succeeding very well there, the Western wilds seemed to allure Mr. Hartle and in 1900, accompanied by his niece, came to Alberta taking up a homestead, where she remained till death.

For twenty-five years Miss Hartle proved to be a capable and kind housekeeper for her uncle, and while our loss is most surely her gain, our deepest sympathy goes to Mr. Hartle in his bereavement.

The funeral services were conducted by Rev. Wilkinson and the remains were interred in the Swedish Lutheran cemetery north of Valley City.
